

# Help remove my jigger!

We want to go to school, and enjoy free education, just like our friends. Our feet and hands are infested with jiggers making us unable to walk, write or concentrate in school. Some children in our school and village taunt and harass us due to our condition. We love sports, but we cannot play because our hands and feet are sore. Jiggers have affected both our school work and play. Our friends died at an early age due to lack of medical care. Our parents cannot afford to build us proper shelter or buy for us medical and sanitation equipments. Some of our parents are disabled and are unable to access medical care leave alone excising their basic rights. Our mothers are giving birth in an undignified manner.

Help Us!
